*Merger Control in Europe* Nov 28 2019 Rev. edition of : "Merger control in the EU," edited by Peter Verloop, 3rd rev. ed., 1999.

**Rent Control in North America and Four European Countries** Jan 23 2022 Rent

control, the governmental regulation of the level of payment and tenure rights for rental housing, occupies a small but unique niche within the broad domain of public regulation of markets. The price of housing cannot be regulated by establishing a single price for a given level of quality, as other commodities such as electricity and sugar have been regulated at various times. Rent regulation requires

that a price level be established for each individual housing unit, which in turn implies a level of complexity in structure and oversight that is unequaled. Housing provides a sense of security, defines our financial and emotional well-being, and influences our self-definition. Not surprisingly, attempts to regulate its price arouse intense controversy. Residential rent control is praised as a guarantor of affordable housing, excoriated as an indefensible distortion of the market, and both admired and feared as an attempt to transform the very meaning of housing access and ownership. This book provides a thorough assessment of the evolution of rent regulation in

North American cities. Contributors sketch rent control's origins, legal status, economic impacts, political dynamics, and social meaning. Case studies of rent regulation in specific North American cities from New York and Washington, DC, to Berkeley and Toronto are also presented. This is an important primer for students, advocates, and practitioners of housing policy and provides essential insights on the intersection of government and markets.

### **The Rise and Fall of Cooperative Arms Control in Europe**

Jun 23 2019 Dreiig Jahre nach dem Fall der Mauer befinden sich die USA und Russland wieder auf Konfrontationskurs. Doch die erneute Auseinandersetzung kam nicht vllig unerwartet. Vielmehr ging ihr eine lange Phase der Stagnation und der letztlich Krise im Bereich der Rstungskontrolle voran. Besonders die Vertrge kooperativer Rstungskontrolle in Europa erodieren bereits seit der Jahrtausendwende. Wie kam es zum Kollaps dieses

engmaschigen Netzwerks kooperativer Sicherheitsabkommen? In diesem Band sprt Ulrich Khn dem Aufstieg und Fall der kooperativen

Rstungskontrolle in Europa von den frhen Helsinki-Tagen bis zur russischen Annexion der Krim 2014 nach. Unter Anwendung eines Multitheorien-Ansatzes zur Untersuchung der Auen- und Sicherheitspolitik der USA und Russlands gelingt es dem Autor, nicht nur die Frage nach den Verantwortlichen der Krise zu beantworten; er entdeckt auch einen bislang unbekanntes Regimekomplex, der sich ber eine Vielzahl von Organisationen und Institutionen erstreckt.

### **Social Control in Europe: 1800-2000**

Dec 22 2021 **The Control of Corporate Europe** Mar 13 2021 Written by an international team of authors, this book provides the first systematic account of the control of corporate Europe based on voting block data disclosed in accordance with the European Union's [creepingsharia.com](http://www.creepingsharia.com)

on December 2, 2022 Free

Download Pdf

Holdings Directive (88/627/EEC). The study provides detailed information on the voting control of companies listed on the official markets in Austria, Belgium, France, Germany, Italy, the Netherlands, Spain, Sweden, the United Kingdom, and, as a benchmark comparison, the United States. The authors record a high concentration of control of corporations in many European countries with single blockholders frequently controlling more than fifty per cent of corporate votes. In contrast, a majority of UK listed companies have no blockholder owning more than ten per cent of shares, and a majority of US listed companies have no blockholder with more than six per cent of shares. Those chapters devoted to individual countries illustrate how blockholders can use legal devices to leverage their voting power over their cash-flow rights, or how incumbents prevent outsiders from gaining voting control. It is shown that the cultural and linguistic diversity of Europe is

(almost) matched by its variety of corporate control arrangements.

*Immigration Policy in Europe*  
Sep 30 2022 Previously published as a special issue of *West European Politics*, this edited volume evaluates the extent to which a policy gap between inputs and outcomes exists with regard to immigration control. In exploring an expanded migration policy-field which includes the extreme right, the media and actors, this book goes beyond traditional analyses that focus on classical moments of policy making and instead seeks to understand the normative and cognitive context in which they operate. Taking into account the recent work of migration scholars into variants of the disjuncture theme, the comparative studies also highlight the variations across time, countries, regions and sectors. The international list of contributors discuss refugee protection, asylum and illegal migration in chapters that fall under three subject areas: formulating policy

implementing policy international policy making. Immigration Policy in Europe will be of great interest to students and scholars of European studies and British politics.

The Wall Around the West Nov 20 2021 As economic and military walls have come down in the post-Cold War era, states have rapidly built new barriers to prevent a perceived invasion of undesirables. This work examines the practice, politics, and consequences of building these walls.

### **Merger Control in Europe**

Mar 01 2020 This book addresses the phenomenon of mergers that may result in non-coordinated effects in oligopolistic markets. Such cases are sometimes referred to as "non-collusive oligopolies", or "gap cases" and there is a concern that they might not be covered by the substantive test that some Member States use for merger assessment. Ioannis Kokkoris examines the argument that the European Community Merger Regulation (Regulation

4064/89) did not capture gap cases and considers the extent to which the revised substantive test in Regulation 139/2004 deals with the problem of non-collusive oligopolies. The author identifies actual examples of mergers that gave rise to a problem of non-coordinated effects in oligopolistic markets, both in the EU and in other jurisdictions, and analyses the way in which these cases were dealt with in practice. The book considers legal systems such as United Kingdom, United States, Australia and New Zealand. The book investigates whether there is any difference in the assessment of non-collusive oligopolies between the various substantive tests which have been adopted for merger assessment in various jurisdictions. The book also looks at the various methodological tools available to assist competition authorities and the professional advisers of merging firms to identify whether a particular merger might give rise to anticompetitive effects.

explores the type of market structure in which a merger is likely to lead to non-coordinated effects in oligopolistic markets.

**Debordering Europe** Jul 05 2020 This contributed volume analyzes in depth how a border area is constantly reshaped as migration policies harden, and what kind of social, political and economic impacts are produced at local and international level. The study is focused on Ventimiglia, an Italian town located 6 km away from the French-Italian border on the gulf of Genoa with a long story of commerce, custom and smuggling activities related to its proximity to the frontier. While several projects have analyzed other symbolic places of the EU migration crisis such as Lampedusa, Calais and Lesvos, there is a severe empirical gap regarding Ventimiglia, a border town at the very geographic core of the Schengen area. This case study may provide emblematic insights into what European migratory movements are currently

revealing in terms of the lack of shared responsibility between EU Member States, the EU common asylum system and respect for human rights, with increasing claims for national sovereignty by some Member States.

*Social Control in Europe* Nov 01 2022 This first volume of a two-volume collection of essays provides a comprehensive examination of the idea of social control in the history of Europe. The uniqueness of these volumes lies in two main areas. First, the contributors compare methods of social control on many levels, from police to shaming, church to guilds. Second, they look at these formal and informal institutions as two-way processes. Unlike many studies of social control in the past, the scholars here examine how individuals and groups that are being controlled necessarily participate in and shape the manner in which they are regulated. Hardly passive victims of discipline and control, these folks instead claimed agency in the process,

accepting and resisting -- and thus molding -- the controls under which they functioned. The essays in this volume focus on the interplay of ecclesiastical institutions and the emerging states, examining discipline from a bottom-up perspective. Book jacket.

### **Quiet Politics and Business**

**Power** Dec 10 2020 Does democracy control business, or does business control democracy? This study of how companies are bought and sold in four countries - France, Germany, Japan and the Netherlands - explores this fundamental question. It does so by examining variation in the rules of corporate control - specifically, whether hostile takeovers are allowed. Takeovers have high political stakes: they result in corporate reorganizations, layoffs and the unraveling of compromises between workers and managers. But the public rarely pays attention to issues of corporate control. As a result, political parties and legislatures are largely absent from this domain. Instead,

organized managers get to make the rules, quietly drawing on their superior lobbying capacity and the deference of legislators. These tools, not campaign donations, are the true founts of managerial political influence.

[Public Expenditure Control in Europe](#) Apr 01 2020 Public Expenditure Control in Europe provides a timely and detailed study of audit control of government expenditure in selected EU countries. It combines the factual and descriptive analysis of senior experts practising in the area with the insights of top academics writing in this field. The studies dissect different cultural and institutional practices in auditing public expenditure highlighting difficulties in gaining European consistency or in auditing across different levels of government. Overall, the book argues for greater harmonization and comparability while allowing room for diversity and

experimentation. John Wanna, Griffith University, Australia  
This book presents a comprehensive analysis of public expenditure control in Europe and the coordination strategies available. It provides a detailed scrutiny of the various audit systems in the EU and the difficulties in building consistency or harmony between them. The book demonstrates how successful strategies should aim to strengthen the collaboration between different layers of government at the EU, national and regional levels. The authors illustrate how effective cooperation between Supreme Audit Institutions (SAIs) is one of the starting points for any rational system of external control of Europe's public finances. However, this cooperation must be founded upon respect for the independence and operating mandate of each SAI and for their different organizational and operational procedures. Importantly, the authors analyse three critical phenomena that determine the

present context in which SAIs develop their activities. These include the impact of the current processes of supranational integration and state decentralization taking place in Europe; the growing demand for transparency, accountability and external control; and the more complex situations created by the loss of a clear distinction between the private and public sectors. The book also offers detailed country studies of audit functions and how they are developed and interpreted, and examines coordination strategies in the context of fraud, auditing, reporting and harmonization. This volume will prove to be an invaluable resource for scholars, students and practitioners of public finance, auditing and administration. It will also be of interest to those working in the areas of public budgeting and public sector management in the EU.

and Control in Europe Mar 25 2022 In Europe, immigration is a politically potent issue—especially when it comes to the treatment of asylum seekers and illegal labor immigrants. This volume draws the reader into the complex and contradictory world of migration regulation and control, covering the wide range of different policy approaches that aim to control the entry and residence of non-EU citizens. Revealing the common framework, tendencies, and policy convergences brought about less by design than a common concern about migration's impact on the future of the EU, *Modes of Migration Regulation and Control in Europe* questions the effectiveness of additional efforts in terms of their fiscal and societal costs. "This important book emphasizes that European countries individually and collectively are converging in their efforts to manage migration."—Philip Martin, University of California, Davis

*Organised Crime in Europe* Jul

29 2022 This volume represents the first attempt to systematically compare organised crime concepts, as well as historical and contemporary patterns and control policies in thirteen European countries. These include seven 'old' EU Member States, two 'new' members, a candidate country, and three non-EU countries. Based on a standardised research protocol, thirty-three experts from different legal and social disciplines provide insight through detailed country reports. On this basis, the editors compare organised crime patterns and policies in Europe and assess EU initiatives against organised crime.

conditionality for membership transformed Central and East Europe. The EU had enormous potential power over the whole range of domestic politics in the candidate countries. However, the EU was able to use that power at a few key points in the process leading to their accession. The EU's long-term influence worked primarily through soft power and through voluntary rather than coercive means. During the membership preparations, the EU built many different routes of influence into the candidate countries' domestic policy-making through 'Europeanization'. The Central and East Europeans voluntarily took on the Union's norms and methods, guided by the European Commission, in a massive transfer of policies and institutions. However, the EU missed important opportunities to effect change as well. The EU's Transformative Power explores in detail how the EU used its influence to control the movement of people across Europe, through both coercive use of conditionality and

voluntary methods of Europeanization.

**Defining Stability** Aug 25 2019 This book analyzes the military situation in Europe and the contending views about the military balance and important military variables there. It provides very useful insights into what has often been a confusing debate about the true state of the military situation.

**Urban Land Policies and Land-use Control Measures: Western Europe** Jul 25 2019

*Development of Judicial Control of the European Communities* Feb 09 2021 The development of the judicial control of the European Communities is perhaps best illustrated by comparing the first decision the Court of Justice rendered in December 1954, under the ECSC Treaty, with its preliminary rulings van Gend & Loos (1962), ENEL (1964) and Simmenthal II (1978) rendered under the EEC Treaty. In the first case the Court quashed a decision of the High Authority impugned by an annulment action of **On Member**

on December 2, 2022 Free

State for an illegal exercise of Community powers - a judicial control which at the time already represented a spectacular legal innovation introduced by the ECSC Treaty. At that time the Court was, for evident reasons, still reserved as to its role within the unprecedented institutional structure of the Community. In *van Gend, ENEL* and *Simmenthal II*, on the other hand, the Court resolutely pursued a judicial policy intended to ensure an effective operation of the Community legal order, a problem hardly envisaged in 1954. In these rulings the Court characterized the emerging legal order and stated its fundamental and indispensable requirements: the unlimited supremacy of Community law and its direct effect. The development of a superior and autonomous Community legal order was finally completed by the Court's recognition of fundamental Community rights of individuals. This development from an initially reserved stand of the Court

searching for its proper role and its potentialities to a bold and determined judicial policy is truly remarkable.

Mechanisms of Immigration Control Aug 06 2020 Perhaps the most vexing question facing Europe today is what to do about asylum seekers and people in search of work who arrive daily, some escaping nations where poverty and persecution are, for them, facts of life. Given its costs - both human and economic - immigration policy has understandably become a highly politicized issue. With the abolition of internal borders within the EU, new controls are needed to stop immigration and to prevent non-citizens from working illegally. New external policies are being used, such as early warning systems and visa controls, with the long-term aim of reducing emigration from poor and war-ridden nations. Europe has also intensified its control of internal aliens. But there are limits to how tight a control can be made without violating

on December 2, 2022 Free

the norms and values of the democratic state, where human rights should be valid for citizens and non-citizens alike. However, free immigration is not in the interests of the European states. It might undermine labour and housing markets, make planning impossible, and alter the preconditions for welfare states. This timely book addresses the politics and mechanisms of immigration control in Europe in an effort to unravel its complexities and propose sensible solutions. It covers recent events, including racist and populist party politics, as well as changes in the international setting, such as the development within the European Union and Schengen, and the recent refugee crisis in the former Yugoslavia. It will be essential reading for anyone interested in immigration studies, European politics, international relations, anthropology and sociology.

*Externalizing Migration  
Management* Oct 20 2021 The extension of border controls beyond a country's territory to regulate the flows of migrants before they arrive has become

a popular and highly controversial policy practice. Today, remote control policies are more visible, complex and widespread than ever before, raising various ethical, political and legal issues for the governments promoting them. The book examines the externalization of migration control from an interdisciplinary and comparative perspective, focusing on 'remote control' initiatives in Europe and North America, with contributions from the fields of politics, sociology, law, geography, anthropology, and history. This book uses empirically rich analyses and compelling theoretical insights to trace the evolution of 'remote control' initiatives and assesses their impact and policy implications. It also explores competing theoretical models that might explain their emergence and diffusion. Individual chapters tackle some of the most puzzling questions underlying remote control policies, such as the reasons why governments adopt these policies and what

might be their impact on migrants and other actors involved.

**Eu State Aid Control Sep 06 2020** EU State Aid Control: Law and Economics thoroughly explores the main rationales of State aid control, the main concerns and the various trade-offs that underlie the rules and the decisions ultimately taken by the European Commission and the Courts. In recent years, the European Commission has conducted an almost complete overhaul of State aid control in the European Union (EU). The SAM initiative has engendered new secondary legislation, as well as new guidelines covering practically all areas of State aid control, including both horizontal and sector-specific rules. Notable in these developments is an increasingly refined economic approach, both in the design of the rules and in the assessment of individual cases. This book is the first of a kind in its in-depth analysis of the current legal and economic principles of EU State aid control. What's in this

book: This book is split into three parts as follows: The first part covers the hotly disputed conditions of economic advantage, selectivity and distortion of competition and effect on trade. The second part covers the compatibility of aid measures under horizontal rules across industry sectors, including an assessment of the efficiency of the General Block Exemption Regulation and of the new rules on ex post evaluation. The third part deals with the application of State aid rules in specific sectors such as infrastructure, broadband, energy and banking. Distinguished experts - including lawyers, economists, academics, and officials of the European Commission and of Member State authorities - share their legal and economic experience, insight and critique of EU State aid control as it stands. How this will help you: As a critical assessment of the current status of EU State aid control from both legal and economic perspectives, and as an authoritative guide to

### **Migrants Before the Law**

Jul 17 2021 This book traces the practices of migration control and its contestation in the European migration regime in times of intense politicization. The collaboratively written work brings together the perspectives of state agents, NGOs, migrants with precarious legal status, and their support networks, collected through multi-sited fieldwork in eight European states: Austria, Denmark, Germany, Italy, Latvia, Lithuania, Sweden and Switzerland. The book provides knowledge of how European migration law is implemented, used, and challenged by different actors, and of how it lends and constrains power over migrants' journeys and prospects. An ethnography of law in action, the book contributes to socio-legal scholarship on migration control at the margins of the state. "This book is a major achievement. A remarkable and

insightful study that through close analysis of the practices of migration control in 8 European countries (Austria, Denmark, Germany, Italy, Latvia, Lithuania, Sweden and Switzerland) provides powerful new insight into the power of the state at its margins and over those that are marginalised.” - Andrew Geddes, Director, Migration Policy Centre, European University Institute “Migrants Before the Law provides a much-needed account of the dizzying legal labyrinth that migrants navigate as they seek to survive in Europe. Based on multi-sited ethnography in detention centres, migration offices, police stations, and non-governmental organizations as well as on interviews with key government actors, advocates, and migrants themselves, this book explores the systems of control and forms of migrant precarity that operate along Europe’s internal borders, in multiple national and transnational contexts. Readers will come away with a

deepened understanding of the perverse workings of power, the ways that the uncertainty and unpredictability of law foster both despair and hope, the degree to which the immigration “crisis” is both manufactured and experienced as real, and the ingenuity of migrants themselves in the face of Kafkaesque state practices.” - Susan Bibler Coutin, Professor of Criminology, Law and Society and Anthropology, University of California, Irvine, USA “Migrants Before the Law is an excellent exposition of the dispersed sites of the law and the hinges and junctions through which this apparatus is actualized in the lives of migrants facing deportation, contesting their status as illegal migrants or seeking to regularize their precarious position. Written with great sensitivity and an eye to minute details this book is also an achievement in furthering the method of collaborative ethnography and new ways of staging comparisons.” - Veena Das, Krieger-Eisenh

*The Market for Corporate  
Control in Europe* Jun 15 2021  
*Controlling Frontiers* Aug 30  
2022 Focusing in particular on  
the European borders, this  
volume brings together an  
interdisciplinary group of  
academics to consider  
questions of immigration and  
the free movement of people,  
linking control within the state  
to the role of the police and  
internal security. The  
contributors all take as the  
point of departure the  
significance of European  
governmentality within the  
Foucauldian meaning as  
opposed to the European  
governance perspective which  
is already well represented in  
the literature. They discuss the  
relation between control of  
borders, introduction of  
biometrics and freedom. The  
book makes available in  
English an analysis of an  
important and politically highly  
charged field from a major  
French critical perspective. It  
draws on different disciplines  
including law, politics,

international relations and  
philosophy.
