Industry 4.0 for SMEs Jun 23 2019 This open access book explores the concept of Industry 4.0, which presents a considerable challenge for the production and service sectors. While digitization initiatives are usually integrated into the central corporate strategy of larger companies, smaller firms often have problems putting Industry 4.0 paradigms into practice. Small and medium-sized enterprises (SMEs) possess neither the human nor financial resources to systematically investigate the potential and risks of introducing Industry 4.0. Addressing this obstacle, the international team of authors focuses on the development of smart manufacturing concepts, logistics solutions and managerial models specifically for SMEs. Aiming to provide methodological frameworks and pilot solutions for SMEs during their digital transformation, this innovative and timely book will be of great use to scholars researching technology management, digitization and small business, as well as practitioners within manufacturing companies.

The Datsun Roadster Car Jan 11 2021 The Datsun Roadster was a lightweight automobile produced by Nissan in the 1930s. The series was a predecessor to the Fairlady sports cars, and was an example of the earliest passenger cars produced in Japan. We added some more road tests - many from foreign magazines - some more brochures, three 1960's vintage Datsun Service Bulletins, and a 20-page color spread from the from October 2007 "Z File - Fairlady and Fairlady Z History". We got permission to publish these pages courtesy of our "roadster friend in Japan" and D.R.F.C. member, Takeshi Izuka. Takeshi, by the way, is the proud owner of an "imported" LHD 1969 2000 that he has maintained in showroom condition.
