Why Government Can't Save You Jan 19 2022 The Lord did not come as a political deliverer or social reformer. He did not rally supporters in a grandiose attempt to "capture the culture" for morality or greater political and religious freedom. Rather, His divine calling was to rescue the lost souls of individual men and women from sin and hell. In *Why Government Can't Save You: An Alternative to Political Activism*, author John MacArthur illustrates through Scripture that, regardless of the numerous immoral, unjuust, and ungodly failures of secular government, believers are to pray and seek to influence the world for Christ by godly, selfless, and peaceful living under that authority, not by protests against the government or by acts of civil disobedience. Dr. MacArthur will explore these areas: Christians' responsibility to authority How and why we should support our leaders How to live righteously in a pagan culture The principle of paying taxes Jesus' lessons on tax exemptions The biblical purpose of government The principle and reasons for civil obedience. "To devote all, or even most, of our time, energy, money, and strategy to putting a façade of morality on the world or the appearance of 'rightness' over our governmental and political institutions is to badly misunderstand our roles as Christians in a spiritually lost world." ?John MacArthur

Pandemia Aug 14 2021 The most important fact about the coronavirus pandemic that turned the world upside down in 2020 is that our response to it has been an epic overreaction driven by a disastrous confluence of public and private interests—all of them purporting to "follow the science." Since the lockdowns began, millions of Americans have relied on the reporting of Alex Berenson. Exposing the hysteria and manipulation behind the worst failure of public policy since World War I, this clear-eyed journalist has been a critical source of reason and truth. The product of relentless investigation and research, *Pandemia* explains how an illness that many people will never even know they had become the occasion for economically ruinous lockdowns and the suppression of personal freedom on a previously unimaginable scale. Dispassionate, factual, and untainted by any agenda other than telling the truth, this is the account that pandemic-weary Americans desperately need.

American Democracy in Crisis Sep 15 2021 Public disenchantment with and distrust of American government is at an all-time high and who can blame them? In the face of widespread challenges—everything from record levels of personal and national debt and the sky high cost of education, to gun violence, racial discrimination, an immigration crisis, overpriced pharmaceuticals, and much more—the government seems paralyzed and unable to act, the most recent example being Covid-19. It's the deadliest pandemic in over a century. In addition to an unimaginable sick and death toll, it has left more than thirty million Americans unemployed. Despite this, Washington let the first round of supplemental unemployment benefits run out and for more than a month were unable to agree on a bill to help those suffering. This book explains why we are in this situation, why the government is unable to respond to key challenges, and what we can do to right the ship. It requires that readers "upstream," stop blaming the individuals in office and instead look at the root cause of the problem. The real culprit is the system; it was designed to protect liberty and structured accordingly. As a result, however, it has left us with a government that is not responsive, largely unaccountable, and often ineffective. This is not an accident; it is by design. Changing the way our government operates requires rethinking its primary goal(s) and then restructuring to meet them. To this end, this book offers specific reform proposals to restructure the government and in the process make it more accountable, effective, and responsive. Jeanne Zaino is Professor of Political Science and International Studies at Iona College, USA. She is the author of three previous books and appears regularly as a commentator in the national and international media. In addition to her teaching and research, she is currently serving as a political contributor at Bloomberg News. Research in the field of political science stretches into an impressive number of areas, but it seems that most examines the personal aspects of governing. Perhaps it is human nature to want to connect a face to a problem, but much of the recent scholarship has focused on how individual actors or political groups have influenced American politics. In this wonderful book, Jeanne Zaino makes the compelling argument that much of our national frustration with gridlock, polarization, and low levels of political efficacy are the fault of the very system that confounds us. -Alison Dagnes, Professor, Shippensburg University, USA.

Among the Hidden Sep 27 2022 In a future where the Population Police enforce the law limiting a family to only two children, Luke, an illegal third child, has lived all his twelve years in isolation and fear on his family's farm in this start to the *Shadow Children* series from Margaret Peterson Haddix. Luke has never been to school. He's never had a birthday party, or gone to a friend's house for an overnight. In fact, Luke has never had a friend. Luke is one of the shadow children, a third child forbidden by the Population Police. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to?

Uncle Sam Can't Count Jun 24 2022 Drawing on examples from the nation's past and present—the fur trade to railroads, cars and chemicals, aviation to Solyndra—*Uncle Sam Can't Count* a sweeping work of conservative economic history that explains why the federal government cannot and should not pick winners and losers in the private sector, including the Obama administration. From the days of George Washington through World War II to today, government subsidies have failed dismally argue Burt and Anita Folsom. Draining the Treasury of cash, they impede economic growth, and hurt the very companies receiving aid. Why does federal aid seem to have a reverse Midas touch? As the Folsoms reveal, federal officials don't have the same abilities or incentives as entrepreneurs. In addition, federal control always equals political control of some kind. What is best for politicians is not often what works in the marketplace. Politicians want to win votes, and they can do so by giving targeted CEOs benefits while dispersing costs to others. Filled with examples of government failures and free market triumphs, from John Jacob Astor to the Wright Brothers, World War II amphibious landing craft to Detroit, *Uncle Sam Can't Count* is a hard-hitting critique of government investment that demonstrates why business should be left exclusively to private entrepreneurs.

What the Eyes Don't See Nov 05 2020 A NEW YORK TIMES NOTABLE BOOK • The dramatic story of the Flint water crisis, by a relentless physician who stood up to power. "Stirring . . . [a] blueprint for all those who believe . . . that 'the world . . . should be full of people raising their voices.'"—The New York Times "Revealing, with the gripping intrigue of a Grisham thriller." —O: The Oprah Magazine Here is the inspiring story of how Dr. Mona Hanna-Attisha, alongside a team of researchers, parents, friends, and community leaders, discovered that the children of Flint, Michigan, were being exposed to lead in their tap water—and then battled

her own government and a brutal backlash to expose that truth to the world. Paced like a scientific thriller, *What the Eyes Don't See* reveals how misguided austerity policies, broken democracy, and callous bureaucratic indifference placed an entire city at risk. And at the center of the story is Dr. Mona herself—an immigrant, doctor, scientist, and mother whose family's activist roots inspired her pursuit of justice. *What the Eyes Don't See* is a riveting account of a shameful disaster that became a tale of hope, the story of a city on the ropes that came together to fight for justice, self-determination, and the right to build a better world for their—and all of our—children. Praise for *What the Eyes Don't See* "It is one thing to point out a problem. It is another thing altogether to step up and work to fix it. Mona Hanna-Attisha is a true American hero."—Erin Brockovich "A clarion call to live a life of purpose."—The Washington Post "Gripping . . . entertaining . . . Her book has power precisely because she takes the events she recounts so personally. . . . Moral outrage present on every page."—The New York Times Book Review "Personal and emotional. . . She vividly describes the effects of lead poisoning on her young patients. . . . She is at her best when recounting the detective work she undertook after a tip-off about lead levels from a friend. . . . 'Flint will not be defined by this crisis,' vows Ms. Hanna-Attisha."—The Economist "Flint is a public health disaster. But it was Dr. Mona, this caring, tough pediatrician turned detective, who cracked the case."—Rachel Maddow

The Color of Law: A Forgotten History of How Our Government Segregated America Oct 24 2019 New York Times Bestseller • Notable Book of the Year • Editors' Choice Selection One of Bill Gates' "Amazing Books" of the Year One of Publishers Weekly's 10 Best Books of the Year Longlisted for the National Book Award for Nonfiction An NPR Best Book of the Year Winner of the Hillman Prize for Nonfiction Gold Winner • California Book Award (Nonfiction) Finalist • Los Angeles Times Book Prize (History) Finalist • Brooklyn Public Library Literary Prize This "powerful and disturbing history" exposes how American governments deliberately imposed racial segregation on metropolitan areas nationwide (New York Times Book Review). Widely heralded as a "masterful" (Washington Post) and "essential" (Slate) history of the modern American metropolis, Richard Rothstein's *The Color of Law* offers "the most forceful argument ever published on how federal, state, and local governments gave rise to and reinforced neighborhood segregation" (William Julius Wilson). Exploding the myth of de facto segregation arising from private prejudice or the unintended consequences of economic forces, Rothstein describes how the American government systematically imposed residential segregation: with undisguised racial zoning; public housing that purposefully segregated previously mixed communities; subsidies for builders to create whites-only suburbs; tax exemptions for institutions that enforced segregation; and support for violent resistance to African Americans in white neighborhoods. A groundbreaking, "virtually indispensable" study that has already transformed our understanding of twentieth-century urban history (Chicago Daily Observer), *The Color of Law* forces us to face the obligation to remedy our unconstitutional past.

What Money Can't Buy Dec 06 2020 Should we pay children to read books or to get good grades? Should we allow corporations to pay for the right to pollute the atmosphere? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars? Auctioning admission to elite universities? Selling citizenship to immigrants willing to pay? In *What Money Can't Buy*, Michael J. Sandel takes on one of the biggest ethical questions of our time: Is there something wrong with a world in which everything is for sale? If so, how can we prevent market values from reaching into spheres of life where they don't belong? What are the moral limits of markets? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life—medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. Is this where we want to be? In his New York Times bestseller *Justice*, Sandel showed himself to be a master at illuminating, with clarity and verve, the hard moral questions we confront in our everyday lives. Now, in *What Money Can't Buy*, he provokes an essential discussion that we, in our market-driven age, need to have: What is the proper role of markets in a democratic society—and how can we protect the moral and civic goods that markets don't honor and that money can't buy?

Agile Government: Emerging Perspectives In Public Management Aug 26 2022 The governments of today are not able to transform and adapt to changes in the world around them, as demanded by their constituents. The nature of work, value of public goods, and the constant bombardment of crises are making the old bureaucratic structures obsolete. Agile Government is an emerging theme, that of government-wide reinvention for adaptiveness and responsiveness. It places the accountability, delivery, capture, design and creation of public value at the heart of the government. The concept of agile government is confused with terms like Agile Manifesto, agile governance, agility among others, and because of this, needs some unpacking. This book is a deep dive into this topic. It offers insights from the theoretical development of the topic of agile government, some lessons from government practices around the world, and ongoing academic and policy research. The project is spearheaded by the Mohammed Bin Rashid School of Government, which is the first teaching and research institution in the Arab world focusing on public policy and governance.

Affluence and Influence Apr 29 2020 Can a country be a democracy if its government only responds to the preferences of the rich? In an ideal democracy, all citizens should have equal influence on government policy—but as this book demonstrates, America's policymakers respond almost exclusively to the preferences of the economically advantaged. *Affluence and Influence* definitively explores how political inequality in the United States has evolved over the last several decades and how this growing disparity has been shaped by interest groups, parties, and elections. With sharp analysis and an impressive range of data, Martin Gilens looks at thousands of proposed policy changes, and the degree of support for each among poor, middle-class, and affluent Americans. His findings are staggering: when preferences of low- or middle-income Americans diverge from those of the affluent, there is virtually no relationship between policy outcomes and the desires of less advantaged groups. In contrast, affluent Americans' preferences exhibit a substantial relationship with policy outcomes whether their preferences are shared by lower-income groups or not. Gilens shows that representational inequality is spread widely across different policy domains and time periods. Yet Gilens also shows that under specific circumstances the preferences of the middle class and, to a lesser extent, the poor, do seem to matter. In particular, impending elections—especially presidential elections—and an even partisan division in Congress mitigate representational inequality and boost responsiveness to the preferences of the broader public. At a time when economic and political inequality in the United States only continues to rise, *Affluence and Influence* raises important questions about whether American democracy is truly responding to the needs of all its citizens.

Give Me a Break Dec 18 2021 Ballooning government? Millionaire welfare queens? Tort lawyers run amok? A \$330,000 outhouse, paid for with your tax dollars? John Stossel says, "Give me a break." When he hit the airwaves thirty years ago, Stossel helped create a whole new category of news, dedicated to protecting and informing consumers. As a crusading reporter, he chased snake-oil peddlers, rip-off artists, and corporate thieves, winning the applause of his peers. But along the way, he noticed that there was something far more troublesome going on: While the networks screamed about the dangers of exploding BIC lighters and coffeepots, worse risks were ignored. And while reporters were teaming up with lawyers and legislators to stick it to big business, they seldom reported the ways the free market made life better. In *Give Me a Break*, Stossel explains how ambitious bureaucrats, intellectually lazy reporters, and greedy lawyers make your life worse even as they claim to protect your interests. Taking on such sacred cows as the FDA, the War on Drugs, and scaremongering environmental activists -- and backing up his trademark irreverence with careful reasoning and research -- he shows how the problems that government tries and fails to fix can be solved better by the extraordinary power of the free market. He traces his journey from cub reporter to 20/20 co-anchor, revealing his battles to get his ideas to the public, his struggle to overcome stuttering, and his eventual realization that, for years, much of his reporting missed the point. Stossel concludes the book with a provocative blueprint for change: a simple plan in the spirit of the Founding Fathers to ensure that America remains a place "where free minds -- and free markets -- make good things happen."

How to Overthrow the Government Apr 22 2022 Powerful and enlightening. *How to Overthrow the Government* is an impassioned call to arms from one of America's sharpest and most independent commentators. In its pages Huffington breaks away from the party-line platitudes of Republicans and Democrats alike while challenging Americans to rise up and take back their government. From the power of special interests to the ravages of the war on drugs, Huffington offers radical yet viable strategies for reclaiming our nation from the corporate and political powers that hold it hostage. For, as she argues, if We the People are to preserve and protect our more perfect union, we must stand up and fight for our country -- before it's too late.
