Now a major motion picture, starring John Diehl, Jean Louisa Kelley, and Ben Ashbrook, directed by Paul Krizan! One dark, vacant Nevada night, cattle rancher Henry McBride closes his eyes—only to open them and find his life suddenly in a shambles, with everything that means anything to him lost forever. Overwhelmed by grief and guilt, Henry drives away from his past as far and as fast as he can; jobs, towns, and whiskey come and go. And then guest ranch owner Jessie King extends an open and forgiving hand, and the arrival of a young mustang stallion—also wounded and alone—ignites a flicker of recognition in Henry. Jessie's powerful ability to connect with horses, and her gentle attempts to connect with

Henry, slow him down long enough to let him heal just a little. But when Jessie's former ranch manager returns with murder in mind, the fragile world she, Henry, and the stallion are building together threatens to come crashing down.

State of the Wild Sep 26 2019

In wild places where nature thrives, humanity prospers; our well-being is inextricably linked with that of the planet's web of life. In fact, one could argue that the state of the world can be measured by the state of the wild. But how do we gauge the state of earth's wildlife, wildlands, and oceans? *State of the Wild* is a new series that brings together some of the world's most renowned conservationists and writers--George Schaller, Alan Rabinowitz, Sylvia Earle, Rick Bass, Bill McKibben, Tom Lovejoy, and many others--to assess wildlife and wilderness, and to provide insights into how humans can become better stewards of the wild. This new series combines evocative writings with a fascinating tour of news highlights and vital statistics from around the world. One-third of each volume will focus on a topic of particular concern to conservationists working to protect wildlife and our last wild places. This 2006 edition explores the impacts of hunting and the wildlife trade through a range of essays: Ted Kerasote traces the history of hunting in North America; Carl Safina, Eric Gilman, and Wallace J. Nichols quantify the toll taken by commercial fishing on seabirds, turtles, and other marine species; James Compton and Samuel K. H. Lee explore the global reach of the wildlife trade for traditional Asian medicine. Contributors also examine other pivotal conservation issues, from the

reasons why one in eight of the world's birds are endangered, to the impacts of global climate change, to the complexity of conserving seals, flamingos, zebras, and other wide-ranging species. The book's closing essay, "The Relative Wild," considers what exactly it means for a place to be "wild," where even the most remote corners of the planet have been altered by human activities. Uniquely structured with magazine-like features up front, conservation news in the middle, and essay contributions from eminent authors and biologists throughout, this landmark series is an essential addition to any environmental bookshelf.

2022 This timely coming of age novel takes on the controversial issues of fracking and environmental protection. Stay away from my woods. Eleven-year-old Fern doesn't have the easiest life. Her stepfather is out of work, and she's responsible for putting dinner on the table--not to mention keeping her wild younger brothers out of trouble. The woods near their home is her only refuge, where she finds food and plays with her neighbor's dog. But when a fracking company rolls into town, her special grove could be ripped away, and no one else seems to care. Her stepfather needs the money that a job with the frackers could bring to their family, and her wealthy grandfather likes the business it brings to their town. Even her best friend doesn't understand what the land means to Fern. With no

one on her side, how can she save the forest that has protected her for so long? The acclaimed author of *Wonder at the Edge of the World* weaves a poignant story about life on the poverty line, the environment, friendship and family--and, most of all, finding your place in the world.

world are koalas, eating roast chicken, and the summer-time. This summer, though, is off to a terrible start. First, Juan's parents separate and his dad goes to Paris. Then, as if that wasn't horrible enough, Juan is sent away to his strange Uncle Tito's house for the entire break! Uncle Tito is really odd: he has zigzag eyebrows; drinks ten cups of smoky tea a day; and lives inside a huge, mysterious library. One day, while Juan is exploring the library, he notices something inexplicable and rushes to tell Uncle Tito. "The books moved!" His uncle drinks all his tea in one gulp and, sputtering, lets his nephew in on a secret: Juan is a Princeps Reader--which means books respond magically to him--and he's the only person capable of finding the elusive, never-before-read Wild Book. Juan teams up with his new friend Catalina and his little sister, and together they delve through books that scuttle from one shelf to the next, topple over unexpectedly, or even disappear altogether to find The Wild Book and discover its secret. But will they find it before the wicked, story-stealing Pirate Book does?

Cathedral of the Wild Sep 06 2020 "This is a gorgeous, lyrical, hilarious, important book. . . . Read this and you may find yourself instinctively beginning to heal old wounds: in yourself, in others, and just maybe in the cathedral of the wild that is our true home."—Martha Beck, author of *Finding Your Own North* Star Boyd Varty had an unconventional upbringing. He

grew up on Londolozi Game Reserve in South Africa, a place where man and nature strive for balance, where perils exist alongside wonders. Founded more than eighty years ago as a hunting ground, Londolozi was transformed into a nature reserve beginning in 1973 by Varty's father and uncle, visionaries of the restoration movement. But it wasn't just a sanctuary for the animals; it was also a place for ravaged land to flourish again and for the human spirit to be restored. When Nelson Mandela was released after twenty-seven years of imprisonment, he came to the reserve to recover. Cathedral of the Wild is Varty's memoir of his life in this exquisite and vast refuge. At Londolozi, Varty gained the confidence that emerges from living in Africa. "We came out strong and largely unafraid of life," he writes, "with the full knowledge of its dangers." It was there that young Boyd and his equally adventurous sister learned to track animals, raised leopard and lion cubs, followed their larger-than-life uncle on his many adventures filming wildlife, and became one with the land. Varty survived a harrowing black mamba encounter, a debilitating bout with malaria, even a vicious crocodile attack, but his biggest challenge was a personal crisis of purpose. An intense spiritual quest takes him across the globe and back again—to reconnect with nature and "rediscover the track." Cathedral of the Wild is a story of transformation that inspires a great appreciation

for the beauty and order of the natural world. With conviction, hope, and humor, Varty makes a passionate claim for the power of the wild to restore the human spirit. Praise for Cathedral of the Wild "Extremely touching . . . a book about growth and hope."—The New York Times "It made me cry with its hard-won truths about human and animal nature. . . . The End of the Wild Jul 17 2021 A wake-up call that argues that although it may be too late to save biodiversity, we can take steps to save our

ecosystems. With the extinction rate at 3000 species a year and accelerating, we can now predict that as many as half of the Earth's species will disappear within the next 100 years. The species that survive will be the ones that are most compatible with us: the weedy species—from mosquitoes to coyotes—that thrive in continually disturbed human-dominated environments. The End of the Wild is a wake-up call. Marshaling evidence from the last ten years of research on the environment, Stephen Meyer argues that nothing—not national or international laws, global bioreserves, local sustainability schemes, or "wildlands"—will change the course that has been set. Like it or not, we can no longer talk about conserving nature, only managing what is left. The race to save biodiversity is over. But that doesn't mean our work is over. The End of the Wild is also a call to action. Without intervention, the surviving ecosystems we depend on for a range of services—including water purification and flood and storm damage contro—could fail and the global spread of invasive species (pests, parasites, and disease-causing weedy species) could explode. If humanity is to survive, Meyer argues, we have no choice but to try to manage the fine details. We must move away from the current haphazard strategy of protecting species in isolation and create trans-regional "meta-reserves," designed to protect ecosystem functions rather than species-specific

habitats.

Hockey in the Wild Jul 25 2019 The lovable trio hits the ice . . . eventually! It's wintertime, and the bear, the moose and the beaver can't wait for hockey season to start. They're so eager, in fact, they head out onto the ice before it's thick enough, and they all fall through. Twice. While they wait for the lake to freeze, they try to take their minds off hockey. There's competitive napping. Karaoke. Lots of comfort food. Until, at last, the day arrives when the ice is ready. But, after all that time not being active, are they ready? The waiting is the hardest part, right?

Cognition in the Wild Jun 23 2019 Edwin Hutchins combines his background as an anthropologist and an open ocean racing sailor and navigator in this account of how anthropological methods can be combined with cognitive theory to produce a new reading of cognitive science. His theoretical insights are grounded in an extended analysis of ship navigation—its computational basis, its historical roots, its social organization, and the details of its implementation in actual practice aboard large ships. The result is an unusual interdisciplinary approach to cognition in culturally constituted activities outside the laboratory—"in the wild." Hutchins examines a set of phenomena that have fallen in the cracks between the established disciplines of psychology and anthropology, bringing to light a new set of relationships between culture

and cognition. The standard view is that culture affects the cognition of individuals. Hutchins argues instead that cultural activity systems have cognitive properties of their own that are different from the cognitive properties of the individuals who participate in them. Each action for bringing a large naval vessel into port, for example, is informed by culture: the navigation team can be seen as a cognitive and computational system. Introducing Navy life and work on the bridge, Hutchins makes a clear distinction between the cognitive properties of an individual and the cognitive properties of a system. In striking contrast to the usual laboratory tasks of research in cognitive science, he applies the principal metaphor of cognitive science—cognition as computation (adopting David Marr's paradigm)—to the navigation task. After comparing modern Western navigation with the method practiced in Micronesia, Hutchins explores the computational and cognitive properties of systems that are larger than an individual. He then turns to an analysis of learning or change in the organization of cognitive systems at several scales. Hutchins's conclusion illustrates the costs of ignoring the cultural nature of cognition, pointing to the ways in which contemporary cognitive science can be transformed by new meanings and interpretations. The Way of the Wild (Also Known as Pinion and Paw) (Illustrated Edition) (Dodo Press) Oct 08 2020 Frank/Francis (Henry) Atkins, Jr. (c1883-1921), who also wrote under the pseudonym Frank Aubrey and F. St. Mars, was the British author of *Pinion and Paw* (also titled *The Way of the Wild*) (1919). If his father had been a brown bear and his mother a badger, the result in outward appearance would have been Gulo, or something very much like him. But not all the crossing in the world could have accounted for his character; that came straight

from the Devil, his master. Gulo, however, was not a cross. He was himself, Gulo, the wolverine, alias glutton, alias carcajou, alias quick-hatch, alias fjeldfras in the vernacular, or, officially, Gulo luscus. But, by whatever name you called him, he did not smell sweet; and his character, too, was of a bad odor.

In the Eye of the Wild Jan 23 2022 After enduring a vicious bear attack in the Russian Far East's Kamchatka Peninsula, a French anthropologist undergoes a physical and spiritual transformation that forces her to confront the tenuous distinction between animal and human. In the *Eye of the Wild* begins with an account of the French anthropologist Nastassja Martin's near fatal run-in with a Kamchatka bear in the mountains of Siberia. Martin's professional interest is animism; she addresses philosophical questions about the relation of humankind to nature, and in her work she seeks to partake as fully as she can in the lives of the indigenous peoples she studies. Her violent encounter with the bear, however, brings her face-to-face with something entirely beyond her ken—the untamed, the nonhuman, the animal, the wild. In the course of that encounter something in the balance of her world shifts. A change takes place that she

must somehow reckon with. Left severely mutilated, dazed with pain, Martin undergoes multiple operations in a provincial Russian hospital, while also being grilled by the secret police. Back in France, she finds herself back on the operating table, a source of new trauma. She realizes that the only thing for her to do is to return to Kamchatka. She must discover what it means to have become, as the Even people call it, medka, a person who is half human, half bear. In the *Eye of the Wild* is a fascinating, mind-altering book about terror, pain, endurance, and self-transformation, comparable in its intensity of perception and originality of style to J. A. Baker's classic *The Peregrine*. Here Nastassja Martin takes us to the farthest limits of human being.

Church of the Wild Aug 18 2021 Once upon a time, humans lived in intimate relationship with nature. Whether disillusioned by the dominant church or unfulfilled by traditional expressions of faith, many of us long for a deeper spirituality. Victoria Loorz certainly did. Coping with an unraveling vocation, identity, and planet, Loorz turned to the wanderings of spiritual leaders and the sanctuary of the natural world, eventually cofounding the Wild Church Network and Seminary of the Wild. With an ecospiritual lens on biblical narratives and a fresh look at a community larger than our own species, *Church of the Wild* uncovers the wild roots of faith and helps us deepen our commitment to a suffering

earth by falling in love with it--and calling it church. Through mystical encounters with wild deer, whispers from a scrubby oak tree, wordless conversation with a cougar, and more, Loorz helps us connect to a love that literally holds the world together--a love that calls us into communion with all creatures.

Into the Wild Mar 25 2022 Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our

imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life.

Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page. *For the Wild* Sep 30 2022 *For the Wild* explores the ways in which the commitments of radical environmental and animal-rights activists develop through powerful experiences with the more-than-human world during childhood and young adulthood. The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection. Emotions and memories of wonder, love, compassion, anger, and grief shape activists' protest practices and help us understand their deep-rooted dedication to the planet and its creatures. Drawing on

analyses of activist art, music, and writings, as well as interviews and participant-observation in activist communities, Sarah M. Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity. **The Wild Book** Feb 09 2021 In a world in which we're never far from our phones or tablets, computers or consoles, we can often be blind to the joy that can be found in the great outdoors. We're building worlds in Minecraft when we could be building a raft; we're watching the latest Netflix show when we could be gazing at the stars; we're idly scrolling on social media when we could be strolling through woodlands; we're internet shopping when we could be panning for gold. Our phones may be smarter, but our experiences have shrunk down to the size of the screens in front of our eyes. *The Wild Book* is here to re-acquaint us with the wonders that await in the outside world. Beautifully produced, full of fun, easy-to-do games and activities - including how to make sloe gin, climb trees, build a fire, identify different cloud formations and make a shelter - this is the ultimate book to unleash your inner child.

Of the Wild Nov 01 2022 Aeric, a shapeshifter of the Wild, steals children from unloving homes and raises them as his own in an enchanted grove deep in the Woods. Under the protective eye of their new guardian, the children absorb the forest's

magic and grow more fey-like than human: some of them sprout mushrooms or flowers while others develop scales or wings. But the reserve of magic that keeps Aeric and his forest home alive is inexplicably running dry. With his life waning and the dangers of the Wild creeping closer and closer, Aeric will do anything to protect his family, even set his hopes on an unlikely new arrival in the Woods: a human stranger.

Wild Jul 29 2022 #1 NEW YORK TIMES BESTSELLER • A powerful, blazingly honest memoir: the story of an eleven-hundred-mile solo hike that broke down a young woman reeling from catastrophe—and built her back up again. At twenty-two, Cheryl Strayed thought she had lost everything. In the wake of her mother's death, her family scattered and her own marriage was soon destroyed. Four years later, with nothing more to lose, she made the most impulsive decision of her life. With no experience or training, driven only by blind will, she would hike more than a thousand miles of the Pacific Crest Trail from the Mojave Desert through California and Oregon to Washington State—and she would do it alone. Told with suspense and style, sparkling with warmth and humor, *Wild* powerfully captures the terrors and pleasures of one young woman forging ahead against all odds on a journey that maddened, strengthened, and ultimately healed her.
