User Unfriendly Jun 15 2021 We've all been there. Seduced by the sleek designs and smart capabilities of the newest gadgets, we end up stumped by their complicated set-up instructions and exasperating error messages. In this fascinating history, Joseph J. Corn maps two centuries of consumer frustration and struggle with personal technologies. Aggravation with the new machines people adopt and live with is as old as the industrial revolution. Clocks, sewing machines, cameras, lawn mowers, bicycles, electric lights, cars, and computers: all can empower and exhilarate, but they can also exact a form of servitude. Adopters puzzle over which type and model to buy and then how to operate the device, diagnose its troubles, and meet its insatiable appetite for accessories, replacement parts, or upgrades. It intrigues Corn that we put up with the frustrations our technology thrusts upon us, battling with the unfamiliar and climbing the steep learning curves. It is this ongoing struggle, more than the uses to which we ultimately put our machines, that animates this quizzical study. Having extensively researched owner's manuals, computer user-group newsletters, and how-to literature, Corn brings a fresh, consumer-oriented approach to the history of technology. User Unfriendly will be valuable to historians of technology, students of American culture, and anyone interested in our modern dependency on machines and gadgets.

WP 34S Owner's Manual and Calculation Guide Nov 01 2022 This manual documents the most recent v3.3 of WP 34S, a free software you can use for converting an HP-20b or HP-30b financial calculator of Hewlett-Packard into a full-fledged fast and compact scientific instrument like you have never had before - readily providing all the functions you always wanted and comfortably fitting into your shirt pocket. The function set of WP 34S is based on the famous HP-42S RPN Scientific, the most powerful programmable RPN calculator industrially built so far. Additionally, we put in the functions of the HP-16C, the HP-32SII, and the HP-21S. Furthermore, we added numerous useful functions for mathematics, statistics, physics, engineering, programming, I/O, etc., such as many statistical distributions and their inverses, Euler's Beta and Riemann's Zeta functions, Bernoulli and Fibonacci numbers, Lambert's W, the error function, and the Chebyshev, Hermite, Laguerre, and Legendre orthogonal polynomials (forget heavy table books), programmable sums and products, first and second derivatives, integer computing in fifteen bases from binary to hexadecimal, bidirectional serial communication with your computer, battery-fail-safe on-board backup memory, 88 conversions, mainly from old Imperial to universal SI units and vice versa, 50 fundamental physical constants plus a selection of important numbers from mathematics, astronomy, and surveying, Greek and extended Latin letters plus mathematical symbols, and a stopwatch based on a real-time clock (with hardware added). WP 34S is the first RPN calculator offering you a choice of two stack sizes: traditional 4 stack levels for HP compatibility, 8 levels for convenient calculations in complex domain, advanced real calculus, vector algebra in 4D, or for whatever application you have in mind. WP 34S features up to 107 global registers, 112 global flags, up to 928 program steps in RAM, up to 6014 program steps in flash memory, a 30 byte alpha register, 16 local flags as well as up to 144 local registers allowing for recursive programming, and 4 user-programmable hotkeys. Most of the memory layout is conveniently settable by you. This is the newest edition of the manual, containing 404 pages. Compared to previous editions, one section, three chapters, and numerous examples were added, easing your path to the over 700 functions of your WP 34S. It also includes everything you want to know about flashing, updating, and tuning your WP 34S. This is the true and original WP 34S reference, written by one of the two initiators of this project. Recommended for any serious science or engineering student as well as for professionals in these areas. WP 34S reached its present state growing on our love for Hewlett-Packard's vintage Classics, Woodstocks, Spices, Nuts, Voyagers, and Pioneers. WP 34S has proven success in real world applications, being on the market since 2011. It has got a little brother: the WP 31S, described elsewhere. Please see <http://www.hpmuseum.org/forum/forum-8.html> for more information about our further progress in this matter. (Last update of the print: 2016-6-6)
