Social Marketing Oct 02 2020 Successful social marketing holds the power to change the world. For almost two decades, *Social Marketing: Behavior Change for Social Good* has been the definitive guide for designing and implementing memorable social marketing campaigns. Bestselling authors Nancy R. Lee and Philip Kotler present a proven 10 Step Strategic Social Marketing Planning Model and guides students and practitioners through each stage of the process. The new Sixth Edition is packed with more than 25 new cases and dozens of new examples related to today's most pressing social problems including the opioid epidemic, climate change, youth suicide, and more. The new edition also includes significantly expanded coverage of social media. Whether you are on a mission to improve public health, protect the environment, or galvanize their community, you will find *Social Marketing* an invaluable resource.

Clocks in the Sky Oct 26 2022 Pulsars are rapidly spinning neutron stars, the collapsed cores of once massive stars that ended their lives as supernova explosions. In this book, Geoff McNamara explores the history, subsequent discovery and contemporary research into pulsar astronomy. The story of pulsars is brought right up to date with the announcement in 2006 of a new breed of pulsar, Rotating Radio Transients (RRATs), which emit short bursts of radio signals separated by long pauses. These may outnumber conventional radio pulsars by a ratio of four to one. Geoff McNamara ends by pointing out that, despite the enormous success of pulsar research in the second half of the twentieth century, the real discoveries are yet to be made including, perhaps, the detection of the hypothetical pulsar black hole binary system by the proposed Square Kilometre Array - the largest single radio telescope in the world.

A Portrait of the Immune System Jan 17 2022 Using the published work of Nobel Laureate Niels Kaj Jerne, this book shows how he developed his ideas. The book is a compilation of his published work, but in fact it is much more than that. Whether the reader wants to read the book systematically, or only browse, it opens a fascinating world of hypotheses, theories, facts and vistas. His selection theory, his view of how immunological diversity is created, and his concept of lymphocytes interacting as a network, reveals Jerne's revolutionary spirit. The book ought to be a rich source of inspiration for everyone interested in science and how science is made.

Contents:Preface:The Master and His Atelier (G Stent)Overview:A Portrait of the Immune System (I Lefkovits)On the Writing of a Paper with N K Jerne by Antonio et al.BibliographyFacsimiles of Selected Publications:A Study of Avidity Based on Rabbit Skin Responses to Diphtheria Toxin-Antioxin Mixtures (N K Jerne)The Natural-Selection Theory of Antibody Formation (N K Jerne)Immunological Speculations (N K Jerne)Plaque Formation in Agar by Single Antibody-Producing Cells (N K Jerne & A A Nordin)The Natural Selection Theory of Antibody FormationTen Years Later, in: "Phage and the Origins of Molecular Biology" (N K Jerne)The Somatic Generation of Immune Recognition (N K Jerne)The Immune System (N K Jerne)Towards a Network Theory of the Immune System (N K Jerne)Idiotypic Networks and Other Preconceived Ideas (N K Jerne)The

The 50 Greatest Dishes of the World Mar 19 2022
Having dined and worked with some of the most brilliant chefs around the world, top food writer James Steen presents the definitive 50 dishes to die for. Let your taste buds travel the world to discover the delights of Vietnam's meaty pho, Japan's aromatic ramen, and the rib-sticking, spicy gumbo of America's Deep South. Learn the truth and fascinating histories of our favourite foods - how Queen Victoria loved a tongue-tingling curry and precisely why Marmite is an essential part of Queen Elizabeth's fried breakfast. Help settle the rows over the origins of the juicy burger, the swirly-peaked pavlova and the cherry-topped ice cream sundae. Oh, and is beef Wellington - so very British - actually named after the streets of Chicago? Including intriguing facts and valuable cooking tips, The 50 Greatest Dishes of the World is the epicurean's indispensable epicurean's travel guide.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Leading-edge Stem Cell Research Jun 10 2021
This book presents recent and important findings on stem cell research which is finding many applications including nervous system diseases, diabetes, heart disease, auto-immune diseases as well as Parkinson's disease, end-stage kidney disease, liver failure, cancer, spinal cord injury, multiple sclerosis and Alzheimer's disease. Stem cells are self-renewing, unspecialised cells that can give rise to multiple types all of specialised cells of the body. Stem cell research also involves complex ethical and legal considerations since they involve adult, foetal tissue and embryonic sources.

Cincinnati Magazine May 09 2021
Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Human Stem Cell Manual Jan 05 2021
Stem cells are self-replicating and undifferentiated, meaning their function is not yet cell, tissue, or organ-specific. Due to the unique nature of these cells, research into their biology and function holds great promise for therapeutic applications through replacement or repair of diseased and damaged cells. This reader-friendly manual provides a practical "hands on" guide to the culture of human embryonic and somatic stem cells. By presenting methods for embryonic and adult lines side-by-side, the authors lay out an elegant and unique path to understanding the science of stem cell practice. The authors begin with a broad-based introduction to the field, and also review legal and regulatory issues and patents. Each experimental

strategy is presented with an historical introduction, detailed method, discussion of alternative methods, and common pitfalls. This lab guide for researchers also serves as a textbook for undergraduate and graduate students in laboratory courses.

Maser Sources in Astrophysics Apr 27 2020 Written for postgraduates and researchers, this is an up-to-date survey of astrophysical maser sources and their use as astronomical tools.

Methods in Mammary Gland Biology and Breast Cancer Research Sep 20 2019 approaches to the experimental problems that still face us in understanding this most fascinating of organs. Too many people contributed to the completion of this volume to allow acknowledgment of all the individual efforts, but we particularly thank the reviewers whose input into the editorial process was invaluable and the authors of these chapters who revised their text, sometimes more than once, to bring it to the high standards set by the Editors. The Committee gratefully acknowledges the support of Vysis, Inc., in the publication of a color figure in Chapter 19, by S. Weber-Hall and Trevor Dale. Finally, we wish to express our heartfelt appreciation to Margot Ip and Bonnie Asch, who worked long and hard to bring this volume to fruition. Margaret C. Neville for the Committee on Mammary Gland Biology Preface One of the most exciting and beneficial developments in research on mammary gland biology and breast cancer has been the influx of increased funding to support this work. This influx, which has been due primarily to the tireless efforts of breast cancer activists to garner additional money from various federal and state sources, has led to a rapid expansion of research efforts by attracting numerous new investigators into the field. These new investigators include students, postdoctoral fellows, and scientists from other fields.

Design and Performance of Large Solar Thermal Collector Arrays Jun 22 2022

Biochemistry of Thermophily Feb 06 2021 Biochemistry of Thermophily covers the proceedings of a seminar held under the auspices of the U.S.-Japan Cooperative Science Program at the East-West Center in Honolulu, Hawaii on June 22-24, 1977. This seminar focuses on biochemistry of thermophilic microorganisms. It presents an achievement in the complex field of thermophiles and their unique properties. This book discusses the fatty acid composition in several strains of moderately and extremely thermophilic bacteria, the membrane and lipid components, the biosynthesis and function of ω -cyclohexyl fatty acids, and the influence of growth temperature and lipid state on lipid and protein distribution. It then presents the ecologic and genetic aspects of thermophilic bacteria, including their morphology, surface structure, and transfection. It also examines the function and thermostability of ribosomal proteins, polypeptides, and polyamines in thermophilic bacteria. Finally, the book discusses the thermostability of proteins, the effect of amino acid substitution on conformational stability of thermophile, the thermophilic enzymes, and the physiology of thermophilic bacteria. This book will be helpful to molecular and research biologists, teachers, and students who wish to expand their understanding on mechanisms of thermophilicity, thermostability, and thermophilic microorganisms.

Let's Go Chile 2nd Edition Jun 29 2020 Completely revised and updated, Let's Go: Chile is the only guide you'll need to uncover South America's best-kept secret. Our forty-five years of travel savvy deliver the knowledge you need, including expanded info on outdoor activities, new and improved listings in Santiago, and brand-new coverage of Easter Island. Valuable hints, tips, and listings provide the practical know-how to see the sights and experience this nation's cultural diversity first-hand. So, whether you'd rather sample fine wines in the vineyards of Concha y Toro, tackle the mountains of Tierra del Fuego, or surf the titanic waves of the Punta de Lobos, Let's Go can lead the way.

Red Book Mar 27 2020

Renewable Energy Cannot Sustain a Consumer Society Jul 23 2022 It is widely assumed that our consumer society can move from using fossil fuels to using renewable energy sources while maintaining the high levels of energy use to which we have become accustomed. This book details the reasons why this almost unquestioned assumption is seriously mistaken. It challenges fundamental assumptions and stimulates the discussion about our common future in a way that will be of interest to professionals and lay-readers alike.
