Dawn of the Code War Oct 27 2019 The inside story of how America's enemies launched a cyber war against us-and how we've learned to fight back With each passing year, the internet-linked attacks on America's interests have grown in both frequency and severity. Overmatched by our military, countries like North Korea, China, Iran, and Russia have found us vulnerable in cyberspace. The "Code War" is upon us. In this dramatic book, former Assistant Attorney General John P. Carlin takes readers to the front lines of a global but little-understood fight as the Justice Department and the FBI chases down hackers, online terrorist recruiters, and spies. Today, as our entire economy goes digital, from banking to manufacturing to transportation, the potential targets for our enemies multiply. This firsthand account is both a remarkable untold story and a warning of dangers yet to come.

Death by a Thousand Cuts Aug 18 2021 Islam - is it a religion or an ideology with a facade of religion - or is it a cult? Islamism, jihad, Muslims, the Qur'an, Salafis, Sharia, abrogation, apostasy, dhimmitude, taqiyya. Muhammad - his life an epic tale - to Muslims, the world's perfect man - probably the most brilliant illiterate in history - some 1.5 billion people idolize him. The Muslim Brotherhood and the myriad of Muslim organizations operating around the world including here in the US. Islam swept out of the desert and conquered from the Atlantic to Indonesia with almost irreversible success and ended local religions. The Middle East is in turmoil Our elected officials, local, state, and federal, have bankrupted our country with debt that can never be paid? Why is China buying up gold in addition to oil, farmland, and minerals all around the world? If China, now the world's second largest economy, consumes the way Americans did, it would absorb so much oil, food, minerals, and water in a few years that there would be little left for the other 5 billion of us! The populations of the industrialized countries are declining (except the USA, only because of expanding Hispanic population, many of whom are illegal immigrants) while those of the Third World are still rapidly growing with increasing pressure on food and water. A new world order is still evolving and it will not likely be to our liking. Read about these and other threats facing America in this hard hitting book from ColDoc Publishing by Richard Hobbs that provides a background for all concerned citizens to better understand the world situation.

A Thousand Cuts Oct 20 2021 A Thousand Cuts is a harrowing, sobering and ultimately inspiring autobiography of Professor T.J. Joseph, who in 2010 became the victim of a brutal terrorist assault, accused

of blasphemy after setting an exam question that enraged fundamentalists. This book is an important reminder of the pernicious effect of religious extremism and the duty of every person to speak out against those who would silence free expression' SHASHI THAROOR 'There is excruciating agony here, but also black humour and irony that enliven and lighten the narrative even at the height of anguish' K. SATCHIDANANDAN 'The poignant tale, with its sense of urgency and helplessness, has been sensitively translated as A Thousand Cuts' RANA SAFVI A chilling account of religious extremism In 2010, T.J. Joseph, a professor of Malayalam at Newman College, Kerala, framed an innocuous question for an internal examination that changed his life forever. Following a trumped-up charge of blasphemy, members of a radical Islamist organization set upon him in public, viciously maiming him and chopping off his right hand. His memoir, told with amazing restraint and wry humour, is the moving tale of his life and family as they went through hell and beyond. Here's the extraordinary story of a man who survived dismembering only to be betrayed by his own Church. Let alone stand by him, it robbed him of his livelihood and isolated him from his community, driving Joseph's long-suffering wife to melancholia and eventual suicide. Joseph's story is one of fortitude, will power, forgiveness and compassion, told with rare wit that will make readers chuckle through their tears. This is a tale that will leave the reader seething, weeping and smiling by turns.

Dangerous Friendship Jun 23 2019 The product of long-concealed FBI surveillance documents, Dangerous Friendship chronicles a history of Martin Luther King Jr. that the government kept secret from the public for years. The book reveals the story of Stanley Levison, a well-known figure in the Communist Party-USA, who became one of King's closest friends and, effectively, his most trusted adviser. Levison, a Jewish attorney and businessman, became King's pro bono ghostwriter, accountant, fundraiser, and legal adviser. This friendship, however, created many complications for both men. Because of Levison's former ties to the Communist Party, FBI director J. Edgar Hoover launched an obsessive campaign, wiretapping, tracking, and photographing Levison relentlessly. By association, King was labeled as "a Communist and subversive," prompting then-attorney general Robert F. Kennedy to authorize secret surveillance of the civil rights leader. It was this effort that revealed King's sexual philandering and furthered a breakdown of trust between King, Robert F. Kennedy, and eventually President John F. Kennedy. With stunning revelations, this book exposes both the general attitude of the U.S. government toward the privacy rights of American citizens during those difficult years as well as the extent to which King, Levison, and many other freedom workers were hounded by people at the very top of the U.S. security establishment.

Imprisoning Communities Jan 29 2020 This volume maintains that current incarceration policy in urban America does more harm than good, from increasing crime to widening racial disparities and diminished

life chances for youths. The author argues that we cannot overcome the problem of mass incarceration concentrated in poor places without incorporating an idea of community justice into our failing correctional and criminal justice systems. He demonstrates that high doses of incarceration contribute to the very social problems it is intended to solve: it breaks up family and social networks; deprives siblings, spouses, and parents of emotional and financial support; and threatens the economic and political infrastructure of already struggling neighborhoods. Especially at risk are children who are more likely to commit a crime if a father or brother has been to prison. The author maintains that when incarceration occurs at high levels, crime rates will go up; having exactly the opposite of its intended effect: it destabilizes the community, thus further reducing public safety.

Death by a Thousand Cuts Mar 25 2022 This fast-paced book by Yale professors Michael Graetz and Ian Shapiro unravels the following mystery: How is it that the estate tax, which has been on the books continuously since 1916 and is paid by only the wealthiest two percent of Americans, was repealed in 2001 with broad bipartisan support? The mystery is all the more striking because the repeal was not done in the dead of night, like a congressional pay raise. It came at the end of a multiyear populist campaign launched by a few individuals, and was heralded by its supporters as a signal achievement for Americans who are committed to the work ethic and the American Dream. Graetz and Shapiro conducted wide-ranging interviews with the relevant players: members of congress, senators, staffers from the key committees and the Bush White House, civil servants, think tank and interest group representatives, and many others. The result is a unique portrait of American politics as viewed through the lens of the death tax repeal saga. Graetz and Shapiro brilliantly illuminate the repeal campaign's many fascinating and unexpected turns--particularly the odd end result whereby the repeal is slated to self-destruct a decade after its passage. They show that the stakes in this fight are exceedingly high; the very survival of the long standing American consensus on progressive taxation is being threatened. Graetz and Shapiro's rich narrative reads more like a political drama than a conventional work of scholarship. Yet every page is suffused by their intimate knowledge of the history of the tax code, the transformation of American conservatism over the past three decades, and the wider political implications of battles over tax policy.

Conservation Biology for All Sep 18 2021 Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Now, fifteen years after it closed former residents have returned to Hawthorne House for their first-ever reunion. probe deeply into the history of Hawthorne House, a troubling picture emerges--of a man who inspired both fear and hatred in the children and families who came to him for help.

Canary Oct 08 2020 We were on the front lines in that world, the mafia world. There was nothing soft or glamorous about it. Who you were before no longer mattered. Names didn't exist. I joined anyway. I had no other choice because they took my sister. Join. Find her. Try and make it out alive. Then he won me in a poker game. I hated him instantly, thinking he was like my other bosses before him. He wasn't. He was worse. He wasn't just cold. He was dead inside. It didn't matter that he was gorgeous. He was the most lethal thing I'd ever met. He was also the only person who could keep me alive, if he didn't kill me himself.

Retreat from a Rising Sea Mar 01 2020 This sobering examination of climate-change and the disastrous effects of rising sea levels explains what must be done to avoid the worst outcomes. By the end of this century, hundreds of millions of people living at low elevations along coasts will be forced to retreat to higher and safer ground. Because of sea-level rise, major storms will inundate areas farther inland and will lay waste to critical infrastructure, such as water-treatment and energy facilities, creating vast, irreversible pollution by decimating landfills and toxic-waste sites. *Retreat from a Rising Sea* explains in gripping terms what rising oceans will do to coastal cities--detailing the specific threats faced by Miami, New Orleans, New York, and Amsterdam. This policy-oriented book then lays out the drastic actions we must take now to remove vulnerable populations. Aware of the overwhelming social, political, and economic challenges that would accompany effective action, the authors consider the burden to the taxpayer and the logistics of moving landmarks and infrastructure, including toxic-waste sites. They also show readers the alternative: thousands of environmental refugees, with no legitimate means to regain what they have lost. The authors conclude with effective approaches for addressing climate-change denialism and powerful arguments for reforming U.S. federal coastal management policies.

Very Cold People Sep 06 2020 The masterly debut novel from "an exquisitely astute writer" (The Boston Globe), about growing up in--and out of--the suffocating constraints of small-town America. "Compact and beautiful . . . This novel bordering on a novella punches above its weight."--The New York Times "Very Cold People reminded me of My Brilliant Friend."--The New Yorker ONE OF THE BEST BOOKS OF THE YEAR: The New Yorker, NPR, Good Housekeeping "My parents didn't belong in Waitsfield, but they moved there anyway." For Ruthie, the frozen town of Waitsfield, Massachusetts, is all she has ever known. Once home to the country's oldest and most illustrious families--the Cabots, the Lowells: the "first, best people"--by the tail end of the twentieth century, it is an unforgiving place awash with secrets. Forged in this frigid landscape Ruthie has been dogged by feelings of inadequacy her whole life. Hers is no picturesque New England childhood but one of swap meets and factory seconds and powdered milk. Shame blankets her like the thick snow that regularly buries nearly everything in Waitsfield. As she grows older, Ruthie slowly learns how the town's prim facade conceals a deeper, darker history, and how silence often masks a legacy of harm--from the violence that runs down the family line to the horrors endured by her high school friends, each suffering a fate worse than the last. For Ruthie, Waitsfield is a place to be survived, and a girl like her would be lucky to get out alive. In her eagerly anticipated debut novel, Sarah Manguso has written, with characteristic precision, a masterwork on growing up in--and out of--the suffocating constraints of a very old, and very cold, small town. At once an ungilded portrait of girlhood at the crossroads of history and social class as well as a vital confrontation with an all-American whiteness where the ice of emotional restraint meets the embers of smoldering rage, *Very Cold People* is a haunted jewel of a novel from one of our most virtuosic literary writers.

A Thousand Cuts May 27 2022 I used to believe in fairy tales. But then I grew up and I realized that life isn't like the books I once loved so much. There are no princes riding in on their white horses. No magic wands or fairy god mothers. And no happily ever afters. Ryland Thorpe taught me the hard way that good doesn't always win and sometimes the people we trust the most are the ones that can hurt us the deepest. At fifteen, my world began and ended with him. He was my older brother's best friend. He was my protector. He was the boy I had loved since I was old enough to understand what loving someone meant. And he was a liar... It's been five years since I've seen him. Five long years and the memory of him still haunts me like it was yesterday. Only he's not just a memory anymore. Prison has hardened him, changed him, altered him in ways I never expected. But beneath it all I can still see a glimmer of the boy I used to love. When lies are exposed and secrets are revealed, I find myself questioning everything I thought I knew. They say the first cut is the deepest. They were wrong... A Thousand Cuts is a complete standalone novel in the Cell Block C Series. A five book series- each book written by a different author in The Romance Collaborative.

On Cold Iron Aug 25 2019 When engineering students in Canada are soon to graduate, the solemn "Ritual of the Calling of an Engineer," penned by none other than Rudyard Kipling, charges them with their Obligation to high standards, humility, and ethics. Each budding engineer then receives an Iron Ring to be worn on the small finger of the working hand as a reminder throughout their career. Through the story of the 1907 Quebec Bridge disaster, in which seventy-six men died, author Dan Levert teaches a powerful object lesson in what can happen when that Obligation is forgotten. Woven from transcripts of the inquiry into the collapse, the report of the commissioners, and other sources including the coroner's inquest, *On Cold Iron* plays out like a fast-paced thriller. Levert recounts the original 1850s proposals to bridge the St. Lawrence near Quebec City, through the design and construction of what was to be the longest clear span bridge of any kind in the world, to its shocking collapse during construction in August 1907. The missteps, poor policies, hubris, and wrong-headed actions begin to build like a death by a thousand cuts, until its inevitable and horrifying culmination. The meticulously researched and deftly delivered story of this terrible historical event makes fascinating reading for anyone, but even more, it is a powerful cautionary tale and a clarion call for the obligation and responsibility of an engineer.

Death by a Thousand Cuts Jun 15 2021 Putting the current crisis of democracy into historical perspective, this book chronicles how would-be despots, dictators, and outright tyrants have finessed the techniques of killing democracies. It shows how autocratic government becomes a kleptoc

The Bad Ones Apr 13 2021 Love isn't always bright and shiny. Sometimes, it's dirty and wrong, buried six feet deep in a secret place where only wild things dare to go. Hidden behind a big black curtain that covers things no one should ever see. Sometimes it happens between two people who should never be allowed to come together. One who is a match, and the other who just happens to be gasoline. One strike is all it takes to burn the whole world down, and that's exactly what they plan on doing. Even if it kills them.

Death by a Thousand Cuts Aug 30 2022 In Beijing in 1904, multiple murderer Wang Weiqin became one of the last to suffer the extreme punishment known as lingchi, called by Western observers "death by a thousand cuts." This is the first book to explore the history, iconography, and legal contexts of Chinese tortures and executions from the 10th century until lingchi's abolition in 1905.

Justice in a Time of Austerity Jul 05 2020 How are poverty and social inequality entrenched through a failing justice system? In this important book, Jon Robins and Daniel Newman examine how the lives of people already struggling with problems with their welfare benefits, jobs, housing and immigration are made much harder by cuts to legal aid and the failings of our creaking justice system. Over the course of 12 months, interviews were carried out on the ground in a range of settings with people as they were caught up in the justice system, in a range of settings such as foodbanks in a church hall in a wealthy part of London; a community centre in a former mining town; a homeless shelter for rough sleepers in Birmingham; and a destitution service for asylum seekers in a city on the South coast, as well as in courts and advice agencies up and down the country. The authors argue that a failure to access justice all too often represents a catastrophic step in the life of the person concerned and their family. This powerful, yet moving, account humanises the hostile political debates that surround legal aid and reveals what access to justice really means in Austerity Britain.

Let the Lord Sort Them May 03 2020 NEW YORK TIMES EDITORS' CHOICE • A deeply reported, searingly honest portrait of the death penalty in Texas—and what it tells us about crime and punishment in America “If you’re one of those people who despair that nothing changes, and dream that something can, this is a story of how it does.”—Anand Giridharadas, *The New York Times* Book Review WINNER OF THE J. ANTHONY LUKAS AWARD In 1972, the United States Supreme Court made a surprising ruling: the country's death penalty system violated the Constitution. The backlash was swift, especially in Texas, where executions were considered part of the cultural fabric, and a dark history of lynching was masked by gauzy visions of a tough-on-crime frontier. When executions resumed, Texas quickly became the nationwide leader in carrying out the punishment. Then, amid a larger wave of criminal justice reform, came the death penalty's decline, a trend so durable that even in Texas the punishment appears again close to extinction. In *Let the Lord Sort Them*, Maurice Chammah charts the rise and fall of capital punishment through the eyes of those it touched. We meet Elsa Alcalá, the orphaned daughter of a Mexican American family who found her calling as a prosecutor in the nation's death penalty capital, before becoming a judge on the state's highest court. We meet Danalynn Recer, a lawyer who became obsessively devoted to unearthing the life stories of men who committed terrible crimes, and fought for mercy in courtrooms across the state. We meet death row prisoners—many of them once-famous figures like Henry Lee Lucas, Gary Graham, and Karla Faye Tucker—along with their families and the families of their victims. And we meet the executioners, who struggle openly with what society has asked them to do. In tracing these interconnected lives against the rise of mass incarceration in Texas and the country as a whole, Chammah explores what the persistence of the death penalty tells us about forgiveness and retribution, fairness and justice, history

and myth. Written with intimacy and grace, *Let the Lord Sort Them* is the definitive portrait of a particularly American institution.

A Thousand Cuts Sep 30 2022 A stunning debut novel that unravels the hidden story behind a school shooting. It should be an open-and-shut case. Samuel Szajkowski, a recently hired history teacher, walked into a school assembly with a gun and murdered three students and a colleague before turning the weapon on himself. It was a tragedy that could not have been predicted. Szajkowski, it seems clear, was a psychopath beyond help. Yet as Detective Inspector Lucia May- the only woman in her high-testosterone office in the Criminal Investigations Department-begins to piece together the testimonies of the various witnesses, an uglier and more complex picture emerges, calling into question the innocence of others. But no one, including Lucia's boss, is interested. As the pressure to close the case builds and her colleagues' sexism takes a sinister turn, Lucia begins to realize that she has more in common with the killer than she could have imagined, and she becomes determined to expose the truth. Brilliantly interweaving the witnesses' accounts with Lucia's own perspective, *A Thousand Cuts* is a narrative tour de force from a formidable new voice in fiction.

Death by a Thousand Cuts Jun 27 2022 Putting the current crisis of democracy into historical perspective, *Death by a Thousand Cuts* chronicles how would-be despots, dictators, and outright tyrants have finessed the techniques of killing democracies earlier in history, in the 20th Century, and how today's autocrats increasingly continue to do so in the 21st. It shows how autocratic government becomes a kleptocracy, sustained only to enrich the ruler and his immediate family. But the book also addresses the problems of being a dictator and considers if dictatorships are successful in delivering public policies, and finally, how autocracies break down. We tend to think of democratic breakdowns as dramatic events, such as General Pinochet's violent coup in Chile, or Generalissimo Franco's overthrow of the Spanish Republic. But this is not how democracies tend to die - only five percent of democracies end like this. Most often, popular government is brought down gradually; almost imperceptibly. Based in part on Professor Qvortrup's BBC Programme *Death by a Thousand Cuts* (Radio-4, 2019), the book shows how complacency is the greatest danger for the survival of government by the people. Recently democratically elected politicians have used crises as a pretext for dismantling democracy. They follow a pattern we have seen in all democracies since the dawn of civilisation. The methods used by Octavian in the dying days of the Roman Republic were almost identical to those used by Hungarian strongman Viktor Orbán in 2020. And, sadly, there are no signs that the current malaise will go away. *Death by a Thousand Cuts* adds substance to a much-discussed topic: the threat to democracy. It provides evidence and historical context like no other book on the market. Written in an accessible style with vignettes as well as new empirical data, the book promises to be the defining book on the topic. This book will help readers who are concerned about the longevity of democracy understand when and why democracy is in danger of collapsing, and alert them to the warning signs of its demise.

A Thousand Cuts Nov 01 2022 *A Thousand Cuts* is a candid exploration of one of America's strangest and most quickly vanishing subcultures. It is about the death of physical film in the digital era and about a paranoid, secretive, eccentric, and sometimes obsessive group of film-mad collectors who made movies and their projection a private religion in the time before DVDs and Blu-rays. The book includes the stories of film historian/critic Leonard Maltin, TCM host Robert Osborne discussing Rock Hudson's secret 1970s film vault, RoboCop producer Jon Davison dropping acid and screening King Kong with Jefferson Airplane at the Fillmore East, and Academy Award-winning film historian Kevin Brownlow recounting his decades-long quest to restore the 1927 Napoleon. Other lesser-known but equally fascinating subjects include one-legged former Broadway dancer Tony Turano, who lives in a Norma Desmond-like world of decaying movie memories, and notorious film pirate Al Beardsley, one of the men responsible for putting O. J. Simpson behind bars. Authors Dennis Bartok and Jeff Joseph examine one of the least-known episodes in modern legal history: the FBI's and Justice Department's campaign to harass, intimidate, and arrest film dealers and collectors in the early 1970s. Many of those persecuted were gay men. Victims included Planet of the Apes star Roddy McDowall, who was arrested in 1974 for film collecting and forced to name names of fellow collectors, including Rock Hudson and Mel Tormé. *A Thousand Cuts* explores the obsessions of the colorful individuals who created their own screening rooms, spent vast sums, negotiated underground networks, and even risked legal jeopardy to pursue their passion for real, physical film.

A Thousand Tiny Cuts Feb 09 2021 From award-winning suspense novelist, Christina Kaye, comes another dark, twisty, suspenseful read. "Fast-paced and unnerving, this book kept me up at night. I could not stop reading. Detective Mena Kastaros is complex, refreshingly relatable, and the kind of sleuth that the crime genre has been waiting for." Casey Dunn, Author of *Silence on Cold River* At a Christmas tree lighting in downtown Lexington, Kentucky, a barefoot, thinly clad young woman runs up to a mounted police officer, frantic and begging for help. She tells the officer her name is Caroline Hanson. But that can't be. Caroline Hanson vanished into thin air ten years ago. When Detective Mena Kastaros is informed that the victim in one of her first cases as a detective has reappeared, she battles emotions she's tried futilely to ignore for nearly a decade. Not only was this case important to Mena, but the details of Caroline's abduction bear a striking resemblance to her own daughter's kidnapping around that same time. The only difference is that Mena's daughter was found dead two weeks later, and here sits Caroline Hanson, alive and relatively unharmed. Mena must use the information she learns from Caroline to track down the man who abducted her-a man who may also be responsible for the death of her daughter. Now, the seasoned detective will face her demons as she seeks to bring this evil monster to justice. But Mena fears her demons may win, and if she finds the man she's hunting, she might not be able to allow the legal system sort it out. Mena must decide which is more important to her...justice...or revenge.

The Wolf at the Door Dec 10 2020 The acclaimed authors of *Death by a Thousand Cuts* argue that Americans care less about inequality than about their own insecurity. Michael Graetz and Ian Shapiro propose realistic policies and strategies to make lives and communities more secure. This is an age of crisis. That much we can agree on. But a crisis of what? And how do we get out of it? Many on the right call for tax cuts and deregulation. Others on the left rage against the top 1 percent and demand wholesale economic change. Voices on both sides line up against globalization: restrict trade to protect jobs. In *The Wolf at the Door*, two leading political analysts argue that these views are badly mistaken. Michael Graetz and Ian Shapiro focus on what really worries people: not what the rich are making but rather their own

insecurity and that of people close to them. Americans are concerned about losing what they have, whether jobs, status, or safe communities. They fear the wolf at the door. The solution is not protectionism or class warfare but a return to the hard work of building coalitions around realistic goals and pursuing them doggedly through the political system. This, Graetz and Shapiro explain, is how earlier reformers achieved meaningful changes, from the abolition of the slave trade to civil rights legislation. The authors make substantial recommendations for increasing jobs, improving wages, protecting families suffering from unemployment, and providing better health insurance and child care, and they guide us through the strategies needed to enact change. These are achievable reforms that would make Americans more secure. *The Wolf at the Door* is one of those rare books that not only diagnose our problems but also show us how we can address them.

[The Death of a Thousand Cuts](#) Jul 29 2022 A corporate campaign is an organized assault on the reputation of a company that has offended some interest group. Although corporate campaigns often involve political, economic, and legal tactics, they are centered around the media, where protagonists attempt to redefine the image—and undermine the reputation—of the target company. It is a strategy most frequently employed by unions but is also employed by special interests, such as environmental or human rights groups. Sometimes it is even employed by one corporation against another. It is a rapidly growing phenomenon that is still unknown to the general public, to most academics and journalists, and is rarely understood by the corporations that find themselves on the firing line. *The Death of a Thousand Cuts* argues and demonstrates that corporate campaigns are a distinctive phenomenon whose manifestations are today ubiquitous in both the marketplace and the media. This volume examines, in considerable detail, the history, strategy, tactics, effects, consequences, and likely future directions of the corporate campaign and of its nonlabor-based cousin, the anticorporate campaign. The book is based on ample sources and methods, among them an extensive review and analysis of media coverage, news releases, previous scholarship, union publications, campaign materials, interviews and conversations with individuals who have experienced corporate campaigns, public presentations by labor leaders and others, correspondence, Internet postings, case law summaries, documents, videotapes, and other materials. Through original data and interpretation, this book adds context and integration to these materials thus giving them new meaning. Key features of this

outstanding new book include: * A thorough and clear explanation of what a corporate campaign is and how it differs from other more mundane "public relations" campaigns. * A detailed examination of strategies and tactics that includes their historical development. Some of the more high profile target companies in recent years include Coca-Cola, Microsoft, Caterpillar, Campbell's Soup, Federal Express, General Dynamics, Home Depot, International Paper, K-Mart, Nike, Texaco, Walmart, Starbucks, and UPS. * Hundreds of examples that help explain such contemporary events as the anti-sweatshop movement on college campuses, the living wage movement, and the protests against the World Trade Organization, International Monetary Fund, and World Bank. * A lengthy appendix contains abbreviated descriptions of nearly 200 corporate campaigns waged by labor unions and various advocacy groups since the idea of the corporate campaign was first developed in the 1960's.

The Gods Sleep Through It All Sep 26 2019 It has been said before that Africa is one of the richest continents in the world but the poorest and colonialism was blamed for Africa's problems before the continent was liberated. Although some leaders still blame colonialism for the poverty that is ravaging the continent today, it cannot be denied that poor governance, corruption, greed among many other ills are causing Africa's current problems. The essays in this collection *The Gods Sleep Through It All* discuss Africa's leadership problems and how most countries still rely on former colonisers for help despite boasting of untold natural wealth. The essays discuss the corruption of political parties and politics in Africa and question why African countries readily open their arms to countries like China but close borders to people from other African countries.

European-Russian Power Relations in Turbulent Times Dec 30 2019 The Russia-Europe relationship is deteriorating, signaling the darkest era yet in security on the continent since the end of the Cold War. In addition, the growing influence of the Trump administration has destabilized the transatlantic security community, compelling Europe—especially the European Union—to rethink its relations with Russia. The volume editors' primary goal is to illuminate the nature of the deteriorating security relationship between Europe and Russia, and the key implications for its future. While the book is timely, the editors and contributors also draw out long-term lessons from this era of diplomatic degeneration to show how increasing cooperation between two regions can devolve into rapidly escalating conflict. While it is possible that the relationship between Russia and Europe can ultimately be restored, it is also necessary to understand why it was undermined in the first place. The fact that these transformations occur under the backdrop of an uncertain transatlantic relationship makes this investigation all the more pressing. Each chapter in this volume addresses three dimensions of the problem: first, how and why the power status quo that had existed since the end of the Cold War has changed in recent years, as evidenced by Russia's newly aggressive posturing; second, the extent to which the EU's power has been enabled or constrained in light of Russia's actions; and third, the risks entailed in Europe's reactive power—that is, the tendency to act after-the-fact instead of proactively toward Russia—in light of the transatlantic divide under Trump.

The Corner That Held Them Nov 28 2019 A unique novel about life in a 14th-century convent by one of England's most original authors. Sylvia Townsend Warner's *The Corner That Held Them* is a historical novel like no other, one that immerses the reader in the dailiness of history, rather than history as the given sequence of events that, in time, it comes to seem. Time ebbs and flows and characters come and go in this novel, set in the era of the Black Death, about a Benedictine convent of no great note. The nuns do their chores, and seek to maintain and improve the fabric of their house and chapel, and struggle with each other and with themselves. The book that emerges is a picture of a world run by women but also a story—stirring, disturbing, witty, utterly entrancing—of a community. What is the life of a community and how does it support, or constrain, a real humanity? How do we live through it and it through us? These are among the deep questions that lie behind this rare triumph of the novelist's art.

Surviving Death By A Thousand Cuts Nov 20 2021 This memoir, written in novel form, is the true story of a legal immigrant family that had a price on its head, a dream in their hearts and a chance to come to America. The Wetzels were Dutch-Indonesian colonists living in South East Asia until 1950 when they made a harrowing escape from Muslim rebel insurgents in Indonesia and fled back to Holland. It includes family pictures and exclusive historical photos and brings transparency and truth to a complicated family history and disparges past vicious rumors and attempts to rewrite the history of the Wetzel family. Their journey

brought them from Holland to the United States in 1956 where the family patriarch, Willy Wetzel, built an American dynasty around a successful family business bringing a previously close kept secret of Indonesian style martial arts to mainstream America. As children, Wim and his younger brothers and sister were trained and groomed to be the first Poekoelan Tjimindie karate instructors in the United States. As Willy Wetzel's oldest son, Wim takes the reader on a unique tumultuous journey through their family history and his personal experiences while walking in his father's shadow. He reveals his personal challenges and

triumphs over a brutally dysfunctional family, undiagnosed dyslexia, typhoid fever, and the brothers coming of age while being engaged in the bloodiest battles of the Viet Nam war. The sons returned home from war with life altering injuries and were greeted by a family in crisis that was so intense that his brother Roy is forced to take their father's life in self-defense in order to save his own life and the life of his daughter. It is a story of family love and forgiveness and as the oldest son, Wim tells his personal story beyond his father's death and walks the reader through the good and bad choices that he made throughout his life.
